# Victims ask Supreme Court: Does justice have a heart?

By Philip L. Salinas

**MANILA**—The Supreme Court is expected to hear arguments on Monday in the *People vs. Velasco* case, which involves the alleged rape of a woman by a police officer. The case is being heard by a panel of five justices, including Chief Justice Renato Corona. The case is being heard in a public hearing, which is a first for the court. The case is being heard in a public hearing, which is a first for the court.

## US Senate expands scope of WMD probe

WASHINGTON, Feb. 10 (AP) — The US Senate has expanded the scope of its investigation into the use of weapons of mass destruction (WMD) by Iraq, including the use of chemical, biological, and nuclear weapons. The Senate committee, led by Sen. Charles Schumer (D-NY), announced the expansion on Monday. The committee will now look into the use of WMD by Iraq in the 1990s, as well as the use of WMD by Iraq in the 2000s. The committee will also look into the use of WMD by Iraq in the 2000s. The committee will also look into the use of WMD by Iraq in the 2000s.

# UN inspectors find nuclear blueprints in Iran

UNITED NATIONS, Sept. 10 — U.N. inspectors have found nuclear blueprints in Iran, a move that could lead to a new round of international sanctions against the Islamic Republic. The blueprints, which were found in a warehouse in the city of Isfahan, show the design of a nuclear reactor and the layout of a nuclear power plant. The blueprints were found by a team of U.N. inspectors led by Mohamed ElBaradei, the head of the International Atomic Energy Agency. The blueprints were found in a warehouse that was used to store nuclear materials. The blueprints were found in a warehouse that was used to store nuclear materials. # Another GI killed in Iraq

By David E. Martin  
 A U.S. Marine was killed in a mortar attack on a base in Iraq on Saturday, the fourth American soldier to die in the conflict since the invasion began last month.

The Marine, 21-year-old Lance Corporal Michael J. Smith, was killed by a mortar round that landed near his position at Camp Bucca, a U.S. Marine base in the southern part of Iraq. Smith was the fourth U.S. Marine to be killed in Iraq since the invasion began on March 20.

The other three deaths were of U.S. Marines: Staff Sergeant Michael J. Smith, Staff Sergeant Michael J. Smith, and Staff Sergeant Michael J. Smith. The fourth death was of a U.S. Marine, Staff Sergeant Michael J. Smith.

The U.S. Marine Corps said that Smith was killed by a mortar round that landed near his position at Camp Bucca. The base is located in the southern part of Iraq, near the border with Kuwait.

## Kerry gains new strength as Bush loses ground

By David E. Martin  
 President George W. Bush's approval rating has fallen to its lowest point since he took office, while Sen. John Kerry's approval rating has risen to its highest point since he took office.

The poll, conducted by the Pew Research Center, shows that Bush's approval rating has fallen from 65% in January to 51% in February. Kerry's approval rating has risen from 33% in January to 47% in February.

The poll also shows that Bush's confidence in the Iraq war has fallen from 65% in January to 51% in February. Kerry's confidence in the Iraq war has risen from 33% in January to 47% in February.

The poll also shows that Bush's confidence in the Iraq war has fallen from 65% in January to 51% in February. Kerry's confidence in the Iraq war has risen from 33% in January to 47% in February.

Figure 1 is a 3D bar chart illustrating the distribution of the number of children per family (0 to 4) across different levels of education (1 to 5). The x-axis represents the number of children (0, 1, 2, 3, 4). The y-axis represents the level of education (1, 2, 3, 4, 5). The z-axis represents the percentage of the population (0 to 100). The chart shows that as the level of education increases, the percentage of families with 0 children increases, while the percentage of families with 1, 2, 3, or 4 children decreases.

# Old grading system revived; 70 is passing

By [Name]

MANILA, Feb. 10 (AP) — The Department of Education has decided to revive the old grading system, where a score of 70 is considered a passing grade. This move is part of a series of reforms aimed at improving the quality of education in the Philippines.

The new system will be implemented in all public schools starting next school year. The Department of Education officials say that the old system was more rigorous and better reflected the actual performance of students.

## Battered wife spared from death penalty, is now free

Figure 1 is a 3D bar chart titled "Log10 normalized frequency of the 100 most abundant taxa". The x-axis is labeled "Log10 normalized frequency" and ranges from 0 to 100. The y-axis is labeled "Log10 normalized frequency" and ranges from 0 to 100. The z-axis is labeled "Log10 normalized frequency" and ranges from 0 to 100. The chart shows a distribution of taxa across different frequency bins. The highest frequency bin (0-10) has the highest number of taxa, followed by the 10-20 bin. The frequency decreases as the bin number increases.

## Drilon urges new Comelec commissioner to quit

Figure 1 consists of four scatter plots arranged in a 2x2 grid. Each plot has 'Number of children' on the x-axis (ranging from 0 to 10) and 'Number of children not in school' on the y-axis (ranging from 0 to 10). The plots are labeled as follows: 'All children' (top-left), 'Children in school' (top-right), 'Children not in school' (bottom-left), and 'Children in school and not in school' (bottom-right). The data points are represented by small circles. The 'All children' plot shows a positive correlation, while the other three plots show a negative correlation.

Figure 1: Schematic representation of the experimental design. The diagram shows a sequence of events: 'Stimulus presentation' (a box with 'Stimulus' and 'Response' labels), followed by 'Response' (a box with 'Response' and 'Feedback' labels), and then 'Feedback' (a box with 'Feedback' and 'Stimulus' labels). The sequence is repeated for 'Trial 1' and 'Trial 2'. The 'Stimulus' box is labeled 'Stimulus' and 'Response'. The 'Response' box is labeled 'Response' and 'Feedback'. The 'Feedback' box is labeled 'Feedback' and 'Stimulus'. The sequence is repeated for 'Trial 1' and 'Trial 2'.

The figure displays a 4x4 grid of 16 small, low-resolution images. These images represent a diverse set of categories from the ImageNet dataset, including animals, objects, and scenes. The images are arranged in four rows and four columns, illustrating the scale and variety of data used in the research.

Your Super! guide  
to Valentine's

## If you don't LOVE, you die

**A**lthough you may not be a superhero, you can still save the day on Valentine's Day. Here are some tips to help you make the most of the day.

**Valentine's Day** is a day to celebrate love and romance. It's a day to show your loved ones how much you care for them. It's a day to be a superhero and save the day.
